THAMSON ANTONY AROCKIASAMY

Business Data Analytics Consultant
thamsonantony@outlook.com | +1 646 269 7372 | Bridgeport, CT | LinkedIn: linkedin.com/in/thamsonantony | Portfolio: thamsonantony.com

SUMMARY

Business Analytics professional with 7+ years of experience delivering data-driven solutions, process optimization, and enterprise application support across banking and energy domains. Skilled in SQL, Python, Power BI, and business process analysis, with proven expertise in translating complex data into actionable business insights. Experienced in stakeholder collaboration, requirements gathering, workflow automation, and operational performance improvement within Agile environments. Holds an M.S. in Business Analytics with specialization in data visualization, machine learning, and decision intelligence.

SKILLS

Competencies: Business Analysis, Data Analytics, Business Intelligence Reporting, Process Optimization, Stakeholder Collaboration, Requirements Gathering, Change Management, Data Visualization, Root Cause Analysis, Workflow Automation, KPI Monitoring, Agile Methodology, SQL, and Cross-Functional Coordination
Data Analytics and Visualization: Power BI, Tableau, Microsoft Excel, Pandas, PySpark, Matplotlib, Seaborn, Scikit
Databases and Querying: SQL, MySQL, SQL Server, DB2, Data warehousing, ETL
Programming Languages: Python, Java, COBOL, JCL
Business and Project Tools: Jira, Confluence, Microsoft Visio, GitHub, Visual Studio Code
Cloud Platforms: Microsoft Azure, AWS
Methodologies: Agile, Waterfall

WORK EXPERIENCE

IT Analyst • Tata Consultancy Services (Client: Citi – Private Banking & Wealth Management) • April 2022 – December 2023
- Enhanced enterprise financial processing systems by optimizing backend applications supporting brokerage and mutual fund operations.
- Partnered with stakeholders, project managers, and cross-functional teams to translate business requirements into scalable technical solutions.
- Analyzed production incidents, performed root cause analysis, and implemented solutions to improve system reliability and operational continuity.
- Optimized DB2 queries across 10+ application modules, reducing CPU utilization by 95% and saving approximately $60K annually.
- Automated operational workflows and ETL data-processing activities to improve efficiency, scalability, and system performance.

Associate and Team Lead • Cognizant (Client: Florida Power & Light – NextEra Energy Inc.) • December 2016 – March 2022
- Supported the development and maintenance of enterprise applications for smart meter management and utility billing operations.
- Led development for a cloud-based electricity meter management platform integrating enterprise databases and cloud APIs via ETL pipeline.
- Coordinated release management, deployment planning, testing, rollback procedures, and post-production support activities.
- Managed production support operations for 12 critical applications while maintaining 98%+ SLA compliance.
- Conducted code reviews, mentored junior developers, and ensured adherence to development standards and operational best practices.
- Identified automation opportunities for repetitive operational tasks using UiPath bots, reducing manual effort by approximately 20 hours per month.
- Collaborated with cross-functional business and technical teams to support seamless system integration and project delivery.
- Contributed to workflow optimization initiatives that improved operational efficiency and issue resolution timelines.

PROJECTS

Energy Consumption Forecasting for Smart Grid Sustainability Using ML & Statistical Models
Tools: Python, XGBoost, SARIMA, Prophet, SQL
- Built time-series forecasting models using historical energy usage, weather, and holiday datasets processed through ETL pipelines.
- Implemented and compared SARIMA, Facebook Prophet, and XGBoost models for predictive performance evaluation.
- Achieved Mean Absolute Percentage Error (MAPE) below 5% for short-term energy forecasting using XGBoost.
- Identified opportunities for 10–15% reduction in peak-hour operational costs and improved renewable energy utilization.

COVID-19 in the U.S.: State-Level Trends in Testing, Positivity, and Recovery using Tableau
- Developed Tableau dashboards to analyze state-level COVID-19 testing, positivity, and recovery trends.
- Created visual reports using maps, tree maps, and comparative charts to identify regional healthcare patterns.
- Transformed large public-health datasets into actionable visual insights supporting data-driven interpretation.

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate [In Progress – Expected June 2026]
- Certification in Business Data Analytics™ (CBDA®) from IIBA™ [In Progress – Expected September 2026]

RECOGNITIONS

- Awarded 'The Incredibles' in the Energy & Utilities Town Hall Awards event in August 2018 at Cognizant.
- Conferred with 'Always Striving Never Settling' Award in the Energy & Utilities Individual Awards in Dec 2021 at Cognizant.

ADDITIONAL EXPERIENCE

Graduate Teaching Assistant • Sacred Heart University
- Facilitated lab sessions and graded assignments for Database Management and Cloud Computing courses, supporting 40+ graduate students.

EDUCATION

Master of Science (MS) in Business Analytics
Sacred Heart University, Fairfield, Connecticut • January 2024 – May 2025 • **GPA**: 3.9/4.0
Relevant Coursework: AI for Business, Applied Statistics, Business Strategy & Analysis, Data Mining, Data Visualization, Machine Learning.

Bachelor of Engineering (BE) in Computer Science
Anna University, Chennai, India • NPR College of Engineering & Technology • September 2012 – May 2016 • **GPA**: 7.86/10
